SOLUTIONS

COMPANY PROFILE

# Introduction

SUN IT Solutions is a Technology and Customer Centric leading Information Technology solutions and service provider company. With our industry best experts team, we specialize in professional provision of quality customized Business IT solutions and consultancy services that are tailor made for each clients needs.

Our customercentric approach focuses on quality service and solutions provision and align a mix of effective value creation with market friendly costs. We follow International laid standards and prioritise quality delivery of services and

solutions. Our comprehensive delivery channels enables us leverage on our expertise flexibility and distribute work across global locations to align with clients cost, market demands and operations requirements.

## **Our Mission**

Quality and Timely Delivery

## **Our Vision**

To be preferred IT partner

## **OUR MAJOR COMPETENCIES ARE IN THE FOLLOWING AREAS:**

### **Implementation of Enterprise Resource Planning and other systems (ERP)**

Systems implementation is the process of:

- Defining how the information system should be built (i.e., physical system design),
- Ensuring that the information system is operational and used,
- Ensuring that the information system meets quality standard (i.e., quality assurance).

### **System Rollouts**

A system Rollout is a structured set of processes that anticipate events, which cause deployment setbacks while providing proactive methodologies designed to mitigate risk. These same processes and methodologies provide consistent, high quality deployments, predictable structures and are scalable to fit the needs of high volume rollouts. A system Rollout uses formal project management techniques to relate cost to schedule performance, identify potential problems and sources and provide enable rapid multi-service rollouts of any technology.

### **System Integrations**

System integration is a process concerned with joining different subsystems within an organization or with any third party systems as

one large system through complex or simple customization, as required. An integrated system will help a management to give sound decisions based on aggregate information.

### **Consulting**

We, as SUN IT Solutions, are engaged in consultancy services to provide our professional advice in the areas of our expertise especially in ERP, Banking etc.

### **Implementation Supervision**

Every implementation needs system control and supervision. The process of supervision ensures whether the implementation is done based on the client's requirement and world best practices or not.

### **Effective Project Management**

An effective project management is a core for any implementation. Expertise of SUN IT Solutions is known by delivering any implementation timely with the expected quality. We follow an implementation methodology, which will lead any project to success.

### **Capacity Building in the form of Training and Change Management**

Capacity building will come through repetitive trainings and change management tasks. Once a project is delivered, the client could be able to take over and continue using a system effectively

and efficiently with no failure. This can be achieved if the users are trained properly.

### **Business Process Re-engineering**

A Business process reengineering aims at cutting down enterprise costs and process redundancies. It is the act of recreating a core business process with the goal of improving quality or reducing cost. The process involves analysis a company workflows, finding processes that are inefficient, and figuring out ways to get rid of them or change them.

### **System Support**

A continued provision of service for the use of improvement of a system during its lifecycle.

### **Training and development**

A systemic approach aimed at improving the performance and outcomes of individuals and groups within the business.

### **Change Management**

The change management process is the sequence of steps or activities that a change management team or project leader follow to apply change management to a change in order to drive individual transitions and ensure the project meets its intended outcomes.

### **IFRS Compliance**

International Financial Reporting Standards (IFRS) are a set of international accounting standards stating how particular types of transactions and other events should be reported in financial statements.

IFRS Standards contribute to economic efficiency by helping investors to identify opportunities and risks across the world, thus improving capital allocation. Use of a single, trusted accounting language lowers the cost of capital and reduces international reporting costs for businesses.

The advantage of establishing global accounting standards is that one format would be used for financial statements. This would make it easier for public companies to compete abroad, raise capital, win global contracts, and provide financial details.

SUN IT Solutions helps companies to adopt IFRS. We provide our service from chart of account conversion to reporting.

### **Process and System Auditing**

An audit is a systematic and independent examination of books, accounts, statutory records, documents and vouchers of an organization to ascertain how far the financial statements as well as non-financial disclosures present a true and fair view of the concern.

SUN IT Solutions provide auditing services.
